

Please replace the heading between paragraphs [0001] and [0002] appearing at page 1 with the following:

--Background of the Invention--

Please replace the heading preceding paragraph [0011] appearing at page 4 with the following:

--Summary of the Invention--

Please replace paragraph [0011] appearing at page 4 with the following:

--The invention is based on the objective of creating a process for insulating stator windings for rotating electrical machines, whereby insulated stator windings are produced that ensure the insulation of the stator winding over the intended life span of the electrical machine.--

Please replace paragraph [0012] appearing at page 5 with the following:

--This objective is realized by the method of applying at least one electrically insulating shrink-on sleeve with a rectangular cross-section to a periphery of at least one electrically conductive conductor bar with a rectangular cross-section and shrinking the shrink-on sleeve onto the conductor bar.--

Please replace the heading preceding paragraph [0024] appearing at page 7 with the following:

C7

--Brief Description of the Drawings--.

C8

Please replace paragraph [0024] appearing at page 7 with the following:

--Preferred embodiments of the invention are disclosed in the following description

and illustrated in the accompanying drawings, in which:--

*Please replace the heading preceding paragraph [0030] appearing at page 8 with
the following:*

C9 --Detailed Description of the Invention--.
